

Ade Farhan

Software Architect | Fullstack Web Developer

Jakarta, Indonesia | 087719388946 | adefarhanzikri@gmail.com | www.adejarhan.com

PROFESSIONAL SUMMARY

Software Architect with hands-on experience designing scalable, efficient, and maintainable systems in a microservices environment. Proven background as a Full-Stack Developer with expertise in Go, Java, and JavaScript, now focused on end-to-end architecture, system design, and technology strategy. Experienced in defining architectural decisions, leading system integration, and collaborating with cross-functional teams to deliver high-performance and reliable solutions.

EXPERIENCE

PT Sprint Asia Technology — Software Architect

Jan 2026 – Apr 2026

- Design scalable, efficient, and maintainable system architectures across multiple services
- Define end-to-end architecture including requirements analysis, technology selection, and deployment strategies
- Collaborate with engineering and product teams to align technical solutions with business goals
- Lead system integration strategy across microservices and external services
- Continuously optimize system performance using data-driven analysis and risk assessment

PT Sprint Asia Technology — Fullstack Web Developer

Nov 2023 – Dec 2025

- Developed backend services using Go with Clean Architecture and microservices approach
- Implemented event-driven systems using RabbitMQ for asynchronous communication
- Built and maintained frontend applications using ReactJS with microfrontend architecture
- Containerized services using Docker and managed deployments with Nginx
- Worked with MongoDB and MySQL, PostgreSQL for data persistence

PT Aplikasi Klikpayroll Indonesia — Fullstack Web Developer

Sep 2022 – Oct 2023

- Built backend services using Spring Boot (Java)
- Developed frontend applications using Vue.js
- Managed cloud infrastructure using AWS services

EDUCATION

Hacktiv8 — Fullstack JavaScript Web Developer
Mar 2022 – Jul 2022

- Intensive coding bootcamp focused on Fullstack JavaScript development
- Learned core web programming fundamentals including HTML, CSS, and JavaScript
- Built backend applications using Node.js and Express.js
- Developed frontend applications using React.js and Vue.js
- Implemented RESTful APIs and integrated frontend with backend services

Jenderal Soedirman University — Bachelor's Degree in Political Science and Government
Feb 2017 – Apr 2021

- Studied political systems, public policy, governance, and institutional analysis
- Developed strong analytical, research, and critical thinking skills
- Gained understanding of decision-making processes, stakeholder management, and regulatory environments

TECHNICAL SKILLS

- Languages: Go, JavaScript, Java, SQL
- Frontend: React.js, Vue.js, Microfrontend Architecture
- Backend: Microservices, Clean Architecture, Event-Driven Systems
- Tools & Platforms: Docker, RabbitMQ, AWS, Nginx, Postman
- Database: MongoDB, MySQL, PostgreSQL

ADDITIONAL SKILLS

- System Design & Software Architecture
 - Analytical Thinking
 - Problem Solving
 - Cross-team Collaboration
-
